**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to an integrated circuit including a configuration column comprising configuration logic for configuring the column of the plurality of columns, classified in class 326, subclass 38.
- II. Claims 10-16, 24-26, 28-29 and 34, drawn to an integrated circuit with significant structure of a heterogenous column having configuration logic, a clock management and an input/output block, classified in class 326, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, Group I pertains to details of a column establish the desired logic operation using configuration logic in the column for configuring the column of the plurality of columns while Group II pertains to the topological arrangement of circuit elements using, among other things, a heterogeneous column having configuration logic, a clock management circuit element and an input/output block. Therefore, Inventions Group I and Group II have a different design, modes of operation and different effect.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Kim Kanzaki on 3-6-2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
